### **INDEPENDENT AUDITOR'S REPORT FOR THE YEAR 1 JANUARY 2012 – 31 DECEMBER 2012**

We have audited the accompanying consolidated balance sheet of Kuveyt Turk Katılım Bankası A.Ş. (the “Bank”) and its financial subsidiaries (the “Group”) as of 31 December 2012, and the related consolidated statements of income, cash flows and changes in equity for the year then ended, and a summary of significant accounting policies and other explanatory notes.

#### **Management's Responsibility for the Financial Statements**

The Board of Directors of the Bank is responsible for the preparation and fair presentation of the financial statements in accordance with the regulation on “Procedures and Principles Regarding Banks' Accounting Practices and Maintaining Documents” published in the Official Gazette dated 1 November 2006 and numbered 26333 and Turkish Accounting Standards (“TAS”), Turkish Financial Reporting Standards (“TFRS”) and other regulations, circulars, communiqués and pronouncements in respect of accounting and financial reporting made by Banking Regulation and Supervision Agency (“BRSA”). This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the regulation on “Licensing and Operations of Audit Firms in Banking” published in the Official Gazette no: 26333 on 1 November 2006 and the International Standards on Auditing. We planned and performed our audit to obtain reasonable assurance whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the consideration of the effectiveness of internal control and appropriateness of accounting policies applied relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Independent Auditor's Opinion**

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2012 and the results of its operations and its cash flows for the year then ended in accordance with the prevailing accounting principles and standards set out as per the Article 37 and 38 of the Banking Act No: 5411, and other regulations, communiqués and circulars in respect of accounting and financial reporting and pronouncements made by BRSA.

**Other matters**

The financial statements of the Group for the year ended 31 December 2011 have been audited by other auditors. The auditors expressed unqualified opinion at their audit report dated 13 April 2012.

**Additional paragraph for English translation:**

The effect of the differences between the accounting principles summarized in Section 3 and the accounting principles generally accepted in countries in which the accompanying financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified and reflected in the accompanying financial statements. The accounting principles used in the preparation of the accompanying financial statements differ materially from IFRS. Accordingly, the accompanying financial statements are not intended to present the Bank's financial position and results of its operations in accordance with accounting principles generally accepted in such countries of users of the financial statements and IFRS.

(\*) The profit distribution of the Parent Bank is decided by the General Assembly which is not held as of date of these financial statements.

(\*\*) Deferred income tax is presented under other tax and legal liabilities. Deferred tax income can not be added into profit distribution, thus it is classified under extraordinary reserves.

(\*\*\*) According to Turkish Law, companies do not distribute consolidated profit. In this context, the profit distribution table shown above belongs to the Parent Bank.

**SECTION THREE**  
**ACCOUNTING PRINCIPLES**

**I. Explanations on basis of presentation**

**a. The preparation of the consolidated financial statements and related notes and explanations in accordance with the Turkish Accounting Standards and Regulation on Accounting Applications for Banks and Safeguarding of Documents:**

The consolidated financial statements have been prepared in accordance with the ‘Regulation on Accounting Applications for Banks and Safeguarding of Documents’ numbered 5411 published in the Official Gazette No:26333 dated November 1, 2006, which refers to ‘Turkish Accounting Standards’ (TAS) and ‘Turkish Financial Reporting Standards’ (TFRS) issued by the ‘Turkish Accounting Standards Board’ (TASB) and additional explanations and notes related to them and other decrees, notes and explanations related to accounting and financial reporting principles (all ‘Turkish Accounting Standards’ or ‘TAS’) published by the Banking Regulation and Supervision Agency. The format and content of the publicly announced unconsolidated financial statements and notes to these statements have been prepared in accordance with the “Communiqué on Publicly Announced Financial Statements, Explanations and Notes to Those Financial Statements”, published in Official Gazette No. 28337, dated 28 June 2007, and amendments to this Communiqué. The Bank maintains its books in Turkish Lira in accordance with the Banking Act, Turkish Commercial Code and Turkish tax legislation.

In accordance with the Article 37 of the Banking Act 5411, the Banks must apply the uniform chart of accounts in their accounting systems in accordance with the procedures and principles identified by the Banking Regulation and Supervision Agency (“BRSA”) by taking into account the international standards and opinions of the TASB and other associations of the banking sector into consideration; record all transactions in accordance with their underlying nature; prepare clear, reliable, comparable, suitable for audit, analysis and interpretation, timely and accurate financial reports in a form and content that meets the information requirements of users.

The Additional Clause 1 of the Law No: 2499 were nullified and Public Oversight, Accounting and Auditing Standards Institution (the “Institution”) was established with the Statutory Decree No: 660, which were published in the Official Gazette and became effective on 2 November 2011. As per the Provisional Article 1 of the Statutory Decree, prevailing standards and regulations will apply until new standards and regulations to be issued by the Institution are in effect. In this respect, this matter has no effect over the basis of preparation of the financial statements disclosed in the accompanying financial statements as of the reporting date.

**b. Classification**

The Group classified Borrowing through the rent certificates (Sukuk) amounting to TL 673,782 from “Funds Borrowed” to “Marketable Securities Issued (Net)” in the 31 December 2011 consolidated balance sheet in accordance with the current period presentation.

The Bank has classified TL 419,149 of precious metal, presented under Cash and Balances with the Central Bank, to “Banks” as of 31 December 2011 in order to be in consistent with the current period presentation.

**NOTES AND DISCLOSURES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 DECEMBER 2012**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**I. Explanations on basis of presentation (continued)**

**c. Accounting policies and valuation principles applied in the preparation of consolidated financial statements:**

The consolidated financial statements have been prepared in TL, under the historical cost convention except for the financial assets and liabilities held for trading carried at fair value.

The preparation of consolidated financial statements in conformity with TAS requires the Bank management to make assumptions and estimates with respect to assets and liabilities on the balance sheet and contingent issues outstanding as of the balance sheet date. These assumptions and estimates are mainly related with the determination of the fair values of the financial instruments and determination of the impairments on assets and these assumptions are being reviewed regularly and, when necessary, appropriate corrections are made and the effects of these corrections are reflected to the income statement.

**d. Preparation of the financial statements in the current purchasing power of money:**

Until 31 December 2004, the financial statements of the Bank were subject to inflation adjustments in accordance with Turkish Accounting Standard No: 29 “Financial Reporting in Hyperinflationary Economies” (“TAS 29”). BRSA explained with its decision numbered 1623 and dated 21 April 2005 and its circular dated 28 April 2005 that the conditions for applying inflation accounting was no longer applicable and accordingly inflation accounting has not been applied beginning from 1 January 2005.

**II. Explanations on strategy of using financial instruments and foreign currency transactions**

The Group follows an asset-liability management strategy that mitigates risk and increases earnings by balancing the funds borrowed and the investments in various financial assets. The main objective of asset-liability management is to limit the Bank’s exposure to liquidity risk, currency risk and credit risk while increasing profitability and strengthening the Bank’s equity. The assets-liabilities committee (ALCO) manages the assets and liabilities within the trading limits on the level of exposure placed by the Executive Risk Committee.

Gains and losses arising from foreign currency transactions have been recorded in the period in which the transaction took place. Foreign currency denominated monetary assets and liabilities are valued with the period end exchange rates published by the Central Bank of Turkey converting them into Turkish Lira and valuation differences of foreign currencies have been recognized in the income statement under the net foreign exchange income/expense account.

The Group’s portion of risk regarding loans originating from participation accounts followed in receivables to be written off, doubtful commission, fees and other receivables, uncollectible loans and other receivables, along with foreign currency (FC) loans and receivables originating from the Bank’s equity and private current accounts are converted to Turkish Lira with the rates prevailing at the date of the transfer of such receivables to non-performing loan portfolio. The participation accounts’ portion of the risk of the foreign currency loans and FC pegged loans, originating from participation accounts, is evaluated with the current foreign currency rates and the differences are recorded foreign currency gains/losses account in the income statement.

The foreign currency exchange differences resulting from the translation of debt securities issued and monetary financial instruments into Turkish Lira are included in the income statement. There are no foreign currency differences capitalized by the Group.

**III. Information about the consolidated subsidiaries**

The consolidated financial statements have been prepared in accordance with the “Turkish Accounting Standard for the Consolidated and Separate Financial Statements” (“TAS 27”).

The subsidiaries included in consolidation and their places of incorporation, nature of activities and shareholding percentages are as follows:

Description	Address (City/Country)	Principal Activity	31 December 2012	31 December 2011
Kuwait Turkish Participation Bank Dubai Ltd.	Dubai/United Arab Emirates	Banking	100%	100%
KT Sukuk Varlık Kiralama A.Ş.	Istanbul/Turkey	Financial Corporation	100%	100%

The Parent Bank and its consolidated subsidiaries of the Parent Bank, as a whole, are named as “Group”.

Consolidation principles of subsidiaries:

Subsidiaries are the entities controlled directly or indirectly by the Parent Bank. Subsidiaries are consolidated using the full consolidation method. Financial statements of related subsidiaries are consolidated from the date when the control is transferred to the Parent Bank.

Control is received as the Bank has more than half of the voting rights directly or indirectly through subsidiaries or not has majority but has privileged shares or has half of the voting rights with respect to agreements made with other shareholders or has authority to manage financial and operating policies of the company through a regulation or an agreement or has power to control the majority of votes at the board of directors or at executive organ containing these rights or has power to appoint or disposal majority of the members of the board of directors.

In the full consolidation method, 100% of subsidiaries’ assets, liabilities, income, expense and off-balance sheet items are combined with the Parent Bank’s assets, liabilities, income, expense and off-balance sheet items. The carrying amount of the Group’s investment in each subsidiary and the Group’s portion of the cost value of the capital of each subsidiary are eliminated. Intragroup balances and intragroup transactions and resulting unrealized profits and losses are eliminated. Minority interests in the net income of consolidated subsidiaries are identified and adjusted against the income of the Group in order to arrive at the net income attributable to the Group and presented separately in the Group’s income.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The special purpose entity, Kuveyt Turk Sukuk Limited was established at 24 August 2010 which is not a subsidiary of the Bank. Since the Bank has 100% control power on the subsidiary it is included in the scope of consolidation.

**IV. Explanations on forward transactions and option contracts and derivative instruments**

The Group enters into forward agreements to decrease its currency risk and to manage its foreign currency liquidity. The Bank classifies its derivative instruments as “Derivative Financial Instruments Held for Hedging Purposes” and “Derivative Financial Instruments Held for Trading” in accordance with “TAS 39”. Even though some derivative transactions economically hedge risk, since all necessary conditions for hedge accounting are not met, they are accounted for as “held for trading” within the framework of “TAS 39”, and are reflected in the “Derivative Financial Assets/Liabilities Held for Trading” account in the balance sheet. The Bank has no derivative financial assets/liabilities for hedging purposes as of balance sheet date.

The payables and receivables arising from derivative transactions are recorded in off-balance sheet accounts at their notional amounts.

Fair values of foreign currency forward transactions and swaps are calculated by using the discounted cash flow model. Differences resulting from the changes in the fair values of derivatives held for trading are accounted under ‘Trading Income/Loss’ line in the income statement.

Embedded derivatives are separated from the host contract if the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract, a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative and the hybrid instrument is not measured at fair value with changes in fair value recognized in profit or loss. Embedded derivatives are accounted as derivative instruments in-line with “TAS 39”. If the embedded derivatives are closely related with the host contract, embedded derivatives are accounted for in-line with the relevant standard applicable for the host contract.

**V. Explanations on profit share income and expense**

Profit share income is recognized in the income statement on an accrual basis by using the method of internal rate of return and is accounted under profit share income account in the financial statements. In accordance with the related regulation, the profit share accruals of non-performing loans are cancelled and are not recorded until the profit share income is realized.

The Group calculates expense accrual in accordance with the unit value calculation method on profit/loss sharing accounts and reflects these amounts in “Funds Collected” account on the balance sheet.

**VI. Explanations on fees and commission income and expenses**

Except for the fees and commission income and expenses obtained for some banking services which are recorded as income when collected, fees and commission income/expenses are reflected in the income statement over the period of the related transaction.

In accordance with the provisions of TAS, commission and fees collected in advance for loans granted are deferred and reflected to the income statement by using the internal rate of return method. Unearned portion of the commission and fees relating to the future periods are recorded to the “Unearned Revenues” account under “Other Liabilities” on the balance sheet.

**VII. Explanations on financial assets**

The Group classifies and accounts for its financial assets as “Fair value through profit/loss”, “Available for sale”, “Loans and receivables” or “Held to maturity”. Sale and purchase transactions of the financial assets mentioned above are recognized at the ‘Settlement dates’. The appropriate classification of financial assets of the Bank is determined at the time of purchase by the Bank management, taking into consideration the purpose of the investment.

**a. Financial assets at fair value through profit or loss:**

This category has two sub categories: “Trading financial assets” and “Financial assets designated at fair value through profit/loss at initial recognition”.

Trading financial assets are financial assets which are either acquired for generating a profit from short-term fluctuations in prices or dealers’ margin, or are financial assets included in a portfolio and derivative instruments in which a pattern of short-term profit making exists.

Trading financial assets are initially recognized at transaction prices, which are assumed to be the fair value, and subsequently measured at fair value. All gains and losses arising from these valuations are reflected in the income statement.

Other than trading financial assets, the Group has no financial assets at fair value through profit or loss.

**b. Financial assets available for sale:**

Financial assets available for sale are initially recognized at cost; which reflects their fair values; including the transaction costs. Financial assets classified as available for sale financial assets which do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less impairment, if any.

Financial assets available-for-sale gains and losses are valued using internal rate of return and recorded in the income statement as profit share income. Financial assets available-for-sale profit share discounts recognized in the profit/share account, current value differences recognized in the “securities value increase fund” under the shareholders’ equity. In case of sales, the realized gain/losses in the shareholders’ equity are recognized directly in the income statement.

**c. Loans and receivables:**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not listed in an active market and are not classified as held for trading, financial assets at the fair value through profit or loss or as available for sale. Loans and receivables are initially recognized at cost, which is assumed to reflect their fair value and subsequently recognized at the amortized cost calculated using the internal rate of return method. The expenses incurred for the loans and receivables received as collateral are not considered as transaction costs and are recognized in the expense accounts.

**d. Held to maturity financial assets:**

Held to maturity financial assets are financial assets with fixed maturities and fixed or determinable payments where management has the intent and ability to hold the financial assets to maturity that are not classified under ‘Loans and receivables’. Held to maturity financial assets are initially recognized at cost which is assumed to reflect their fair value, and subsequently carried at ‘Amortized Cost’ using the ‘Internal Rate of Return’. Profit share income from held to maturity financial assets is reflected in the income statement. The Group does not have any held to maturity financial assets as of the balance sheet date.

**VIII. Explanations on impairment of financial assets:**

At each balance sheet date an assessment is made as to whether there is objective evidence that a financial asset or group of financial assets is impaired. If such evidence exists, impairment is provided for financial asset categories as explained below.

i) Loans and receivables:

If there is objective evidence that the loans might not be collected, the Parent Bank reclassifies such loans to III., IV. and V. groups and provides impairment reserve in accordance with the Communiqué of “Principles and Procedures for the Determination of the Quality of Loans and Other Receivables and Reserves to be provided for these Loans” published on 1 November 2006 in the Official Gazette No: 26333 and “Communiqué for the amendment of the Communiqué of “Principles and Procedures for the Determination of the Quality of Loans and Other Receivables and Reserves to be provided for these Loans” published on 25 December 2012 in the Official Gazette No: 28508. For the loans with poor financial position and/or payment capability, the Parent Bank can provide a specific impairment reserve in excess of the amounts calculated using the minimum required rates for the related group.

Collections related to the provisions provided in the current period for such loans are deducted from “Provisions for Loan losses and Other Receivables” account in the income statement. Subsequent recoveries of amounts previously written off or provisions made in prior periods are included in “Other Operating Income” in the income statement.

In the case where there is evidence for the possibility of uncollectability of loans, the Bank classifies related loans and receivables in non-performing loans and provides specific and general provision, in accordance with the Communiqué dated 1 November 2006, published on the Official Gazette No: 26333 and revised with the Communiqué dated 6 March 2010, published on the Official Gazette No: 27513 and the Communiqué dated 21 September 2012, published on the Official Gazette No: 28418 “Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves”. In addition, the Group provides general provision calculation as per regulations published in the Official Gazette No: 27968 dated 18 June 2011, Official Gazette No: 27947 dated 28 May 2011, Official Gazette No: 28158 dated 30 December 2011 and Official Gazette No: 28418 dated 21 September 2012.

ii) Financial assets held to maturity:

If there is objective evidence indicating that the value of financial assets held to maturity is impaired, the amount of the loss is measured as the difference between the present values of future estimated cash flows discounted using the original profit share and the carrying value; provision is made for impairment and the provision is associated with expense accounts

iii) Financial assets available for sale:

If there is objective evidence indicating that the fair value of an available for sale financial asset, for which decreases in the fair value has been accounted under the equity, has been impaired then the total loss which was accounted directly in the equity is transferred from equity to the income statement.

Impairment losses recognized in the income statement related to the investments in equity instruments classified as available for sale financial assets cannot be reversed through the income statement. If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Impairment losses on equity instruments cannot be reversed.

**IX. Explanations on offsetting of financial assets and liabilities**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay the related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously.

**X. Explanations on sale and repurchase agreements and lending of securities**

The Group has no sale and repurchase agreements transactions and lending securities transactions.

**NOTES AND DISCLOSURES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 DECEMBER 2012**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**XI. Explanations on assets held for sale and discontinued operations and related liabilities**

As mandated by the Banking Act 5411 Article 57 “Banks cannot participate in commercial real-estate and commodity trade with the exception of real-estate and commodity based agreements within the scope of Capital Markets Act No. 2499, and precious metal trade as seen appropriate by the board, and cannot participate in partnerships with firms whose main business activity is commercial real-estate, with the exception of real-estate investment partnerships and companies that finance mortgaged residential estates. The rules and procedures regarding the sales of real-estate and commodities that were acquired due to receivables and debtors’ obligations to the bank are determined by the board.”

The principles for valuation and accounting for disposal of assets acquired by banks in return for their nonperforming loans are determined by the official communication of “Principles and Procedures on Bank’s Disposal of Precious Metals and Assets Held for Sale” No. 26333 published on 1 November 2006 and No. 26592 published on 24 April 2007 in the Official Gazette.

Assets that meet the criteria for classification as assets held for sale are measured at the lower of the carrying amount of assets and fair value less any costs to be incurred for disposal. Assets held for sale are not amortized and presented in the financial statements separately. In order to classify an asset as held for sale, the sale should be highly probable and the asset (or disposal group) should be available for immediate sale in its present condition. Highly saleable condition requires a plan by the management regarding the sale of the asset (or the disposal group) together with an active program for the determination of buyers as well as for the completion of the plan. Also the asset (or the disposal group) should be actively in the market at a price consistent with its fair value. In addition, the sale is expected to be recognized as a completed sale within one year after the classification date and the necessary transactions and procedures to complete the plan should demonstrate the fact that there is remote possibility of making any significant changes in the plan or cancellation of the plan. Various events and conditions may extend the completion period of the disposal over one year. If such delay arises from any events and conditions beyond the control of the entity and there is sufficient evidence that the entity has an ongoing disposal plan for these assets, such assets (or disposal group) can remain to be classified as assets (or disposal group) held for sale. Extension of the period necessary to complete the sale, does not avoid the classification of the related asset (or disposal group) to be classified as asset held for sale.

Although the Group has assets acquired due to receivables and debtors’ obligations to the Group, such assets are classified as fixed assets rather than assets held for sale and are amortized due to inability to dispose them or to produce a solid plan for disposal within a year within the provisions of banking legislation.

On the other hand properties acquired by the Bank due to receivables and debtors’ obligations to the Bank are reflected as assets held for sale in the financial statements provided that there is a contracted term sale agreement.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale. Discontinued operations are presented separately in the income statement. The Parent Bank has no discontinued operations.

**XII. Explanations on goodwill and other intangible assets**

Intangible assets are stated at cost adjusted for inflation until 31 December 2004, less provision for impairment, if any, and accumulated amortization and amortized with straight-line method.

The other intangible assets of the Group comprise mainly computer software. The useful lives of such assets acquired prior to 2004 have been determined as 5 years and for the year 2004 and forthcoming years, as 3 years.

There is no goodwill related to associates and subsidiaries.

**NOTES AND DISCLOSURES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 DECEMBER 2012**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**XIII. Explanations on tangible assets**

Fixed assets are stated at cost adjusted for inflation until 31 December 2004, less accumulated depreciation and provision for impairment, if any.

Depreciation is calculated on a straight-line basis over the estimated useful life of the assets. The annual rates used for amortization are as follows:

Property	2%
Movables, Leased assets	6.67% - 20%

Depreciation is calculated on a pro-rata basis for the assets that have been placed in use for less than one year as of the balance sheet date. Leasehold improvements are depreciated over the term of the lease agreements by straight-line method.

If the recoverable amount (the higher of value in use and fair value) of a tangible asset is less than its carrying value, impairment loss is provided and the carrying value is written down to its recoverable amount.

Gains or losses resulting from disposals of the fixed assets are recorded in the income statement as the difference between the net proceeds and net book value of the asset.

Expenses for repairs are capitalized if the expenditure increases economic life of the asset; other repair costs are expensed.

Property held for long-term rental yields and/or capital appreciation is classified as investment property. Investment properties are stated at cost less accumulated depreciation and any impairment in value. Depreciation is calculated on a straight-line basis over the estimated useful lives of the properties.

**XIV. Explanations on leasing transactions**

*Bank as a lessee*

Assets acquired under finance lease contracts are recorded both as an asset and a liability at the beginning date of the lease. The basis for the determination of these amounts is the lower of fair value of the leased asset or the present value of the lease payments. The direct costs incurred during a finance lease transaction are capitalized as additions to the cost of the leased asset. Lease payments include the financing costs incurred due to the leasing transaction and the principal amount of the leased asset for the current period.

Depreciation is calculated on a straight-line basis over the estimated useful life of the leased assets and if a diminution in recoverable value of the leased asset is identified, a provision for impairment is recognized.

Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term.

*Bank as a lessor*

The Parent Bank, as a participation bank, acts as a lessor in finance leasing transactions. The Group presents finance leased assets as a receivable equal to the net investment in the lease. Finance income is based on a pattern reflecting a constant periodic rate of return on the net investment outstanding.

**NOTES AND DISCLOSURES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 DECEMBER 2012**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**XV. Explanations on provisions and contingent liabilities**

Provisions and contingent liabilities are accounted for in accordance with “Turkish Accounting Standard for Provisions, Contingent Liabilities and Contingent Assets” (“TAS 37”).

Provisions are recognized when the Group has a present obligation, legal or constructive, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The Bank recognizes provisions for obligations which arose from prior periods in current financial year, only if, the possibility of realization is high and a reliable estimation can be made.

A provision is provided if liabilities have been originated as a result of past events in the period they arise, if it is probable that the liability will be settled and a reliable estimate for the liability amount can be made.

When a reliable estimate of the amount of the obligation cannot be made or it is not probable that an outflow of resources will be required to settle the obligation, the obligation is considered as a “Contingent” liability and is disclosed in the related notes to the financial statements.

**XVI. Explanations on liabilities relating to employee benefits**

**a) Defined benefit plans:**

In accordance with existing social legislation, the Group is required to make severance pay to each employee who has completed over one year of service with the Group and who retires or quits the employment to receive old age or disability benefits, to fulfil the compulsory military service, because of the marriage (for females) or because of the other compulsive reasons as defined in the laws and whose employment is terminated due to reasons other than resignation or misconduct.

The retirement pay provision recognized in the accompanying financial statements, is calculated based on “Turkish Accounting Standard on Employee Benefits (“TAS 19”), and based on upon factors derived using the past experience of the Group with respect to completion of service period and eligibility to receive retirement pay and discounted at the balance sheet date.

The Group’s employees are not members of any pension fund, foundations, union or other similar entities.

**b) Defined contribution plans:**

The Parent Bank pays defined contribution plans to publicly administered Social Security Funds for its employees as mandated by the Social Security Association. The Bank has no further payment obligations other than this contribution share. The contributions are recognized as employee benefit expense when they are due.

**c) Short term benefits to employees:**

In accordance with “TAS 19”, vacation pay liabilities are defined as “Short Term Benefits to Employees” and accrued as earned and not discounted.

Group management calculates bonus accrual if it foresees that the budgeted year-end figures approved by the Board of Directors are attainable.

**XVII. Explanations on taxation**

***Current tax***

The corporate tax rate in Turkey is 20%. This rate is applied on taxable income which is calculated by adjusting the income before tax for certain disallowable expenses, tax exempt income and other allowances. No further tax is applicable unless the profit is distributed. According to the tax code, each quarter advance tax amount is calculated using a rate of 20% over tax base and paid, then the paid advance taxes are deducted from the corporate tax liability that is calculated for the year.

Withholding taxes is not applied to dividends distributed to companies resident in Turkey or companies who earn income in Turkey through their resident representatives in Turkey. With the Council of Minister's decision numbered 2009/14593 and 2009/14594 which are published in official gazette numbered 27130 and dated 3 February 2009, some deduction rates in 15th and 30th articles of the corporate tax law numbered 5520 were re-determined. In accordance with this, dividends distributed to companies other than companies resident in Turkey or companies who earn income in Turkey through their resident representatives in Turkey are subject to 15% withholding taxes. Double tax treaty agreements are also taken into consideration during the application of withholding taxes on dividends distributed to real persons and to foreign based taxpayers. Addition of profit to share capital is not considered as dividend distributed therefore no withholding taxes is applied.

Corporate tax returns are filed by the twenty fifth day of the fourth month following the balance sheet date and taxes is paid in one instalment by the end of that month.

Corporate tax losses can be carried forward for a maximum period of five years following the year in which the losses were incurred. However, losses cannot be carried back to offset profits from previous periods. The tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years.

In Turkey, there is no procedure for a final and definite agreement on tax assessments.

***Deferred tax***

The Group calculates and accounts for deferred income taxes for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in these financial statements in accordance with "Turkish Accounting Standard for Income Taxes" ("TAS 12"). Deferred tax asset is calculated on all temporary differences other than general provisions to the extent that is probable that taxable profit will be available and deferred tax liability is calculated for all temporary differences. Deferred tax asset and liabilities are shown in the accompanying financial statements on a net basis. If transactions and events are recorded directly in the shareholders' equity, the related tax effects are recognized directly in the shareholders' equity.

**XVIII. Explanations on additional disclosures on borrowings**

Borrowings other than funds collected are measured at amortized cost using the internal rate of return method after the initial recognition. The Group does not apply hedging techniques on related borrowings.

There are no debt securities issued by the Group.

The Group has not issued convertible bonds.

***Borrowing through the rent certificates (Sukuk)***

In order to collect funds from various investors, the Parent Bank issued a 5 year term rent certificate amounting to USD 350 million on 31 October 2011 with a profit share rate of 5.875%. The Parent Bank has performed this issue through KT Sukuk Varlık Kiralama A.Ş. (Note V Part I-i), which is a subsidiary of the Parent Bank that is established specifically for this transaction (the issuance of the rent certificates). Funds collected by KT Sukuk Varlık Kiralama A.Ş. from rent certificate investors, amounting to USD 350 million, is transferred to the Bank in exchange of some of the real estate assets, loan receivables and leasing receivables of the Parent Bank. Within the scope of the aforementioned transaction, the Parent Bank sold its real estate properties with a net book value of TL 61,195 to KT Sukuk Varlık Kiralama A.Ş. for a consideration equal to their market price of TL 248,734 (USD 136,870 thousand) and leased back these real estate assets for 5 years with a repurchase option at the end of the fifth year.

**XVIII. Explanations on additional disclosures on borrowings (continued)**

*Borrowing through the rent certificates (Sukuk) (Continued)*

In accordance with the letter received from BRSA, numbered B.02.1.BDK.0.06.00.00-045.01(3/8)-5397 and dated 13 March 2012 this transaction is accounted for as “sale and lease back” transaction in accordance with “TAS 17”. As a consequence of this accounting treatment, the net book value of the real estate property transferred and leased back increased from TL 61,195 to TL 248,734. The difference of TL 187,539 between the net book value of TL 61,195 before the aforementioned transaction and the net book value of TL 248,734 after the aforementioned transaction will be recognized as income in 5 years using the effective interest method and accounted for as deferred income under other liabilities. Current period TL 20,896 of the aforementioned deferred income is recognized as income in the income statement. The difference accounted as tangible assets mentioned above, will be recognized as expense by accounting under “other expenses” in the income statement during the period of lease.

As a result of the lease back of the real estate property, the total amount of semi-annual rental payments to be made to KT Sukuk Varlık Kiralama A.Ş. in 5 years and total amounting to USD 177,076 thousand is discounted with a profit share rate of 5.875% to the date of the transaction as USD 136,870 thousand and accounted for as financial lease payables.

The remaining part of the total funds of USD 350 million transferred by KT Sukuk Varlık Kiralama A.Ş. to the Bank which is not part of the sale and leaseback transaction and amounting to USD 213,130 thousand is accounted for as Funds Borrowed in the balance sheet.

While preparing the consolidated financial statements as per TFRS explanation 27, the below eliminations and classifications have been performed to borrowings through the rent certificate (Sukuk) which is accounted at the stand alone financial statements as mentioned above .

The difference between the sales price and the net carrying value before the sale amounting to TL 184,729 (31 December 2011: TL 186,914) of the real estate property concerning rent certificate is eliminated from “Tangible Assets”, deferred income amounting to TL 163,414 (31 December 2011: TL 184,310) is eliminated from “Other Liabilities”, current period PL effect of deferred income from real estate property amounting to TL 20,896 (31 December 2011: None) and amortization expense based on the revaluation of property amounting to TL 2,185 (31 December 2011: None) and fixed asset impairment amounting to TL 18,711 is eliminated from other operating expenses.

**XIX. Explanations on share certificates issued**

The Parent Bank's paid in capital increased by TL 150,000 from 2011 net profit (TL 195,042), after distributing TL 27,737 as reserves and TL 17,305 as dividend.

**XX. Explanations on acceptances and availed drafts**

Acceptances and availed drafts are realized simultaneously with the payment dates of the customers and they are presented as commitments in off-balance sheet accounts.

**XXI. Explanations on government grants**

There are no government grants received by the Group.

**XXII. Explanations on segment reporting**

The Group operates in three main segments; Corporate and Commercial Banking; Retail Banking; International Banking, Treasury and Investment Banking. Each segment operates with unique products, and the operational results are followed based on these segments.

Segment reporting is disclosed in Section Four, Note X.

**XXIII. Explanations on other matters**

There are no other matters to be disclosed by the Group.

**XXIV. Additional paragraph for convenience translation**

The effects of differences between accounting principles and standards set out by regulations in conformity with article 37 of the Banking Act No. 5411, the accounting principles generally accepted in countries in which the accompanying financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified in the accompanying consolidated financial statements. **INFORMATION ON FINANCIAL STRUCTURE**

**I. Explanations on consolidated capital adequacy standard ratio**

Capital adequacy ratio is calculated in accordance with the “The Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks” published in the Official Gazette No: 26333, dated 1 November 2006 and “The Regulation on Amendments to the Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks” published in the Official Gazette No: 26669, 26824, 27320, 27968 and 28337 dated 10 October 2007, 22 March 2008, 15 August 2009, 18 June 2011 and 28 June 2012 respectively.

For the calculation of the capital adequacy ratio, the accounting records prepared in compliance with the current legislation are used. Such accounting information is included in the calculation of credit and market risks subsequent to their designation as “trading book” and “banking book” according to the Regulation.

Trading books include in and off the balance sheet accounts and positions over which derivative financial instruments and speculative-purpose derivative instruments are followed up, the financial instruments and commodities held by the Bank for the purpose of performing purchase and sales transactions in order to benefit from the price differences expected or realized as short term and/or between the purchase and sales prices or the other price and rate of exchange changes and in order to protect from the risks or reduce such risks arising of the positions relevant to the mentioned financial instruments and commodities. The accounts other than the trading books are defined as banking books.

Banking books include Due from Central Bank, Due from Banks, Loans and Receivables, Leasing Receivables, Transactions and Other Assets items in the assets; and Funds Collected, Securities Issued, Borrowings, Subordinated Loans, Other Liabilities items in the liabilities. The derivative financial instruments and available-for-sale financial assets are followed up over the Trading Books.

Risk measurement methods used in the determination of the standard rate capital adequacy ratio by way of determination of the risk-weighted assets and non-cash loans according to the risk weight rates in the relevant regulation and inclusion within the capital adequacy standard rate calculations after calculation of the market risk and the operational risk in compliance with the relevant regulations. Credit risk is calculated by subjecting the risk-weighted assets and non-cash loans to the risk weight rates in the relevant legislation and application of the risk reduction techniques, and the standard method is used for the market risk and the basic indicator method is used for the operational risk.

Based on the Communiqué concerning “Measurement and Assessment of Capital Adequacy of Banks”, the capital adequacy ratio of the Bank is 14.16%.

**Approaches for assessment of adequacy of internal capital requirements for current and future activities**

Internal evaluation process is established for continuously evaluating and maintaining the types, components and distribution of the adequate level of capital in order to provide for various risks exposed to or to be exposed to. The final purpose of the evaluation process of the internal capital requirement, is to define and evaluate whether all the risks are included in the calculation of the legal capital requirements, within the frame of the activities of the bank, and to provide the availability of adequate capital in order to cover for these risks and the application of the risk management techniques. The results obtained in this evaluation process by taking into consideration, the Group's growth strategy, assets-liabilities structure, funding sources, liquidity position, foreign currency position, the effects of the price and market fluctuations on the capital, which are among the variables of the economy, aim to provide the continuity of the mentioned capital adequacy level at the determined level in compliance with the Groups risk profile and risk appetite.

Within this scope, 2012 capital structure is reviewed as based on the frame of the activities and risks exposed to, and the internal capital requirement, probable to occur within the direction of 2013 targets and strategies of the Group is evaluated. This evaluation includes interest rate risk, concentration risk, liquidation risk, reputation risk, residual risk, country risk and strategic risk arising of the banking books as well as market, credit and operational risks. Capital requirement internal evaluation is evaluated to be a developing process and the development areas for the future period are determined and plans are prepared.

**II. Explanations on Consolidated Credit Risk**

Credit risk means the risks and damages to arise as a result of partial or complete non-fulfilment of the obligations timely by non-compliance of the counter party with the requirements of the agreement concluded with the Group.

With regards to the credit risk, the debtor or the group of debtors is subjected to risk limitation. The upper limit of the rate of the credits granted to the companies in one sector to the total credits is determined annually by the Board of Directors and is updated as required.

The credit risk which the Group is exposed to outside of Turkey is followed up by the Board of Directors within the frame of the determined limits according to countries and regions. Within this scope, the total risk which the Group is exposed in the foreign country or region, the total of the credit risk taken by the banks residing abroad and/or their branches in Turkey, the total risks of the credits granted to the people residing abroad or with foreign nationality, the risk total taken over the corporate customers and/or banks to which the partners residing in Turkey but of which the principal shareholder or shareholders reside in another country, had given guarantee and in required cases, the risk total taken by the Group in Turkey should be followed up.

The risks and limits arising from the treasury transactions and customer based commercial transactions are followed up daily. Moreover, the review of the limits allocated as based on the ratings of the correspondent banks and the maximum risk that the Group can take within its equity; are also performed daily. The risk limits relevant to the transactions performed daily are determined and the risk intensity relevant to the off balance sheet transactions are being followed up.

As provided for in the Principles and Procedures for the Determination of the Quality of Loans and Other Receivables and Reserves to be provided for these Loans, the credit worthiness of the debtors of the loans and the other receivables are followed up at regular intervals, in case of early determination of a probable repayment problem, the credit limits are redefined and additional guarantees are received and in order to sustain the profitability of the Bank. The account statement documents are received as defined in the legislation, during the loan generation process. The guarantees are received within the frame of the relevant legislation, by consideration of the quality of the credit and the financial structure of the company and as based on the credit committee decision.

**II. Explanations on Consolidated Credit risk (continued)**

The loans which do not exceed the passed due limits to be classified as Third Group loans defined in the Principles and Procedures for the Determination of the Quality of Loans and Other Receivables and Reserves to be provided for these Loans, are classified as "past due" loans; all the loans and receivables classified in the third, fourth and fifth groups indicated in the same Regulation are accepted to be "impaired loans".

The positions in the form of futures, options agreements and similar agreements are not held.

Non-cash loans which are liquidated, are subject to the same risk weight with the overdue loans as stated in the communique on Principles and Procedures for the Determination of the Quality of Loans and Other Receivables and Reserves to be provided for These Loans. The rescheduled and restructured loans are followed up in compliance with the methods determined in the relevant legislation.

Foreign trade financing and inter-banks loan transactions are performed by a wide network of correspondents. The country risks, limits, correspondent risks and limits are regularly evaluated within this scope.

There is no material credit risk concentration when evaluated together with the financial activities of the other financial institutes.

The Group's largest 100 and 200 cash loan customers represent 11% and 15% of the total cash loan portfolio, respectively.

The Group's largest 100 and 200 non-cash loan customers represent 43% and 54% of the total non-cash loan portfolio, respectively.

The Group's largest 100 and 200 cash and non-cash loan customers represent 22% and 28% of the total cash and non-cash loan portfolio, respectively.

The general provision for credit risk amounts to TL 138,118.

In compliance with the 7th article of the Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks, determination of the risk weights is performed based on the credit ratings provided by the rating companies.

The ratings of an international credit rating institution are used for Banks and Corporate Receivables and being limited to the receivables in which the counter party resides abroad. The receivables from the banks are examined under two different receivable classes based on the remaining term. If the remaining term is 3 months or less, these are classified as "Short Term Receivables from Banks and Brokerage Houses" and if more than 3 months, as "Receivables from Banks and Brokerage Houses". The banks and institutions residing in the country are evaluated without rating.

The ratings provided by the international rating institution are used while determining the class of risk weighted asset. The ratings of the credit rating institution are used for Banks and Corporate Receivables class, being limited to the receivables, in which the counter party resides abroad.

"Credit Quality Levels" corresponding to the ratings of the credit rating institution are presented in the following table.

**III. Explanations on consolidated market risk**

The Group has established market risk operations and has taken the necessary precautions in order to manage market risk within its financial risk management purposes under “Risk Management Systems” in accordance with BRSA “Regulation on Banks’ Internal Systems” published in the Official Gazette No. 26333 dated 1 November 2006.

Organizational and functional internal applications of risk management systems have been determined by the Board of Directors in accordance with the regulation mentioned above. The Bank approved the regulation related to the “Risk Management Systems and Working Procedures and Principles of the Risk Management Presidency”. With this internal regulation and Treasury Directorship’s Marketing and Liquidity Risk Management Policy and Application Procedures which are also approved by the Board of Directors, the procedures with respect to management of market risk are determined. Additionally, the Board of Directors, without transfer of its responsibility, requires the consent of the risk management group and the top management of the Bank to take necessary actions in order to identify, measure, control and manage the risks that the Bank is exposed to.

Additionally, in accordance with the official communication on “Measurement and Assessment of Capital Adequacy of Banks”, published in the same Official Gazette as mentioned above, and in the context of other related regulations, the Bank has started to calculate and report to BRSA the amount subject to market risk with the Standard Method and the amount thus calculated has been considered in the capital adequacy calculation of the Bank.

The capital which should be kept against general market risk and specifics risks, is calculated and monthly reported in accordance with the “Marketing risk measurement process with standard method” which is the third chapter of “Calculation of Marketing Risk Amount” of the “Communiqué on the “Measurement and Assessment of Capital Adequacy of Banks”. The following table indicates the details of the market risk calculation as of 31 December 2012, in accordance with the Market Risk Calculation principles pursuant to the Part 2 of the Second Section of the “Regulation on Measurement and Assessment of Capital Adequacy of Banks” published in the Official Gazette No. 28337 on 28 June 2012.

**Quantitative information on counterparty risk**

In counterparty credit risk calculations, the fair value methodology is used according to the Appendix-2 of the "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks". In case of derivative transactions, the total of replacement costs and potential credit risks is considered as the exposure amount. The replacement costs are calculated valuing the contracts at their fair values and the potential credit risks are calculated multiplying the contract amounts with the credit conversion factors set in the appendix of the regulation.

**Information on Consolidated Operational Risk**

"Basic Indicator Method" is used during calculation of the consolidated operational risk of the Group. The sum that is the basis for the operational risk is calculated by the use of the gross revenues of the Bank for the last 3 years, 2011, 2010 and 2009 in compliance with "Third Section "Calculation of the Operational Risk" of The Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks published in the Official Gazette numbered 28337 and dated 28 June 2012. The annual gross revenue is calculated by adding of the net fees and commission revenues, dividend income obtained other than subsidiaries and affiliates, the trading gain/loss(net) and other operating income to the net profit share income and by deduction of the gain/loss from the sale of the assets accounted other than the trading book, extraordinary income, the operational expenses for the support services taken from the main shareholder of the bank, subsidiary of the bank or subsidiary of the shareholder of the bank performing the calculation or the institutions which are subject to the relevant Regulation or the equivalent arrangements and the operational expenses for the support service received from a bank and the amounts compensated from insurance. TL 95,383 corresponding to the 8% of TL 1,192,287 used in the calculation of the operational risk within the scope of "Capital adequacy standard rate" indicated in the disclosure I of this section, represents the operational risk which might be exposed to. TL 95,383 also defines the minimum capital sum which is required in order to eliminate the mentioned risk.

**IV. Explanations on consolidated currency risk**

Foreign currency risk represents the Group's exposure to loss due to the changes in foreign currency exchange rates. All foreign currency assets, liabilities and foreign currency forward transactions are considered in calculation of capital to be employed for foreign currency risk according to Standard Method.

The Parent Bank monitors daily the designated limits set by the Board of Directors and additionally observes the possible value changes in foreign currency positions. The limits are determined and followed both for the net foreign currency position and for the cross exchange rate risk within the position. As a tool of foreign currency risk management, foreign currency forward transactions are used when necessary to mitigate the risk.

As of 31 December 2012, the Group carries a net foreign currency long position of TL 21,745 (31 December 2011 – TL 463 long position) comprising TL 334,605 balance sheet long position (31 December 2011 - TL 4,655 long position) and TL 312,860 off balance sheet short position (31 December 2011 - TL 5,118 long position).

**V. Explanations on position risk of equity securities in banking book**

a) Relation of risks with gains accounted under equity and analysing according to their aims including strategic reasons and the accounting policies applied and general information about valuation techniques with assumptions in this application, the elements that manipulate valuation and important changes:

The Group's non-quoted securities are accounted for fair value. When the fair value cannot be reliably measured, the cost method is used.

b) Carrying value of share investments, for fair value and quoted securities, comparison with market value if market value is significantly different from fair value:

Equity Securities (shares)		Comparison	
	Carrying Value	Fair Value	Market Value

**VI. Explanations on consolidated liquidity risk**

Liquidity risk represents risk of not having sufficient cash or cash inflows to completely meet the cash outflows on time as a result of imbalance in cash flows.

Liquidity risk may also result from inability to penetrate to market or change positions quickly at suitable prices and amounts due to market disruptions or barriers. To mitigate liquidity risk, the Group diversifies funding sources (customer funds and funds borrowed from abroad) and keeps a certain level of assets as cash and cash equivalents.

The Group determines the liquidity position daily and the treasury department manages market transactions in accordance with the liquidity position of the Group. Indicators of liquidity conditions are analysed at the weekly Asset/Liability meetings with the participation of top management.

The liquidity position of the Group's assets and liabilities within framework of the monitoring and evaluation of the liquidity ratio is calculated on a weekly basis. Rates during the period are as follows:

<b>First Maturity Bracket (Weekly)</b>			
	<b>Average (%)</b>	<b>Highest (%)</b>	<b>Lowest (%)</b>
FC	287.89	456.18	146.16
TL+FC	217.67	301.97	134.34

**VIII. Credit risk mitigation techniques**

The Bank applies the Comprehensive Financial Collateral Techniques explained in “Credit Risk Mitigation Techniques Communiqué” published in Official Gazette No. 28337 as of 28 June 2012.

There is no balance sheet and off-balance sheet offsetting.

Credit risk mitigation techniques used by the Bank in terms of credit facility are listed as follows:

- Financial Collaterals (Cash, Deposit Pledges, Gold)
- Guarantees
- Real Estate Mortgage

Financial collaterals are evaluated on a daily basis.

For loans that are amounting over TL 3,000 or loans amounting to over 5% of the equity, real estate valuation should be repeated minimum every 3 year by the rating companies authorized from the Banking Regulation and Supervision Agency or Capital Markets Boards of Turkey.

Volatility in real estate market is closely followed by the Bank; values of real estate for commercial real estates are revised at least every year whereas housing real estates are revised at least in every 3 year.

**IX. Explanations on risk management objectives and policies**

Risk Management System refers to the Board of Directors, the Audit Committee, the Risk Management Committee, Asset-Liability Committee (“ALCO”) and the Risk Management Department (“RMD”) which has been composed in order to manage systemic risks that the Parent Bank is exposed. The Board of Directors is the owner of the Bank's Risk Management System and ensures the establishment of an effective, sufficient and appropriate risk management system as well as the continuity of the system. The main objective of the Bank's Risk Management System is to identify, measure, monitor and control the risks that the Bank is exposed to, by determining the policies, limits and procedures to control, to monitor, and if necessary to change the risk-return structure of the Bank's future cash flows and the level & the quality of related activities.

In accordance with Parent Bank's strategies, risk policies and vision, the analyses that Risk Management Service presents to Internal Systems Committee and Audit Committee are credit risks, market risks, liquidity risks, operational risks and Information Technologies (“IT”) risk evaluations. Besides, in accordance to market trends, economic conduct and Bank's strategic growth, capital adequacy stress test and scenario analyses, evaluation of economic development in the World and Turkey are presented to Internal Systems Committee and Board of Directors by Risk Management Service. These analyses contribute to Bank Top Management's resolution process about risk appetite and awareness of risks, capital adequacy, strategy revisions and future estimation.

In addition, Risk Management Service verifies its own coordination to be ready proactively in business availability of Kuveyt Türk and situations connected with it.

Risk Management Service continues risk monitoring and analysing operations in accordance to Board of Director's Kuveyt Türk's mission, vision and growth strategy to prevent the potential risks. In this context credit and market risks, liquidity risk, operational risks and all limits, internal personal scoring and corporate rating modelling with IT risks issues, IT risk evaluation, operational lost data base, key risk indicators, operational risk insurances, market risk calculations, following up of treasury transactions and asset-liability risks are being motorized.

**Fair values of financial assets and liabilities**

The table summarizes the book value and fair value of the financial assets and liabilities that were not accounted by the values in Group's financial statements. Book value is the sum of the acquisition value and accumulated profit share accruals.

	<b>Book Value</b>		<b>Fair Value</b>	
	<b>Current period</b>	<b>Prior period</b>	<b>Current period</b>	<b>Prior period</b>
<b>Financial Assets</b>				
Banks	1,583,872	832,409	1,583,872	832,409
Financial assets available for sale	549,496	6,542	549,496	6,542
Loans and lease receivables	11,867,351	10,382,855	12,057,527	10,245,524
<b>Financial Liabilities</b>				
Current account and funds collected from banks via participation accounts.	296,422	111,065	296,422	111,065
Other current and profit sharing accounts	12,455,735	9,805,754	12,455,735	9,805,754
Funds provided from other financial institutions	2,709,573	2,585,385	2,748,140	2,647,847
Marketable Securities issued	811,539	194,145	848,473	207,115
Miscellaneous payables	92,456	140,965	92,456	140,965

The estimated fair value of the loans is calculated by discounting future cash flows by using current market rates of profit share. The fair value of financial assets and liabilities carried at amortized cost other than loans, available for sales financial assets and funds provided from other financial institutions approximates to their book values since they are short term in nature and their effective profit share rates are similar with current effective profit rates.

Provisions from equity/profit sharing accounts	14,713	13,762
Other	334	860
<b>Total</b>	<b>41,957</b>	<b>38,325</b>

(\*) Effective from 1 March 2011, according to temporary article 2 of “Regulation on Procedures and Principles for Determination of Qualifications of Loans and Other Receivables by Banks and Provisions to be Set Aside”, the Bank recognizes provisions for non- liquidated non-cash loans and check books of customers who have any other non-performing exposures within the Bank.

4. Information on provisions for employee benefits:

Provisions for employee benefits consist of reserve for employee termination benefits amounting to TL 11,806 (31 December 2011 – TL 9,192), vacation pay liability amounting to TL 435 (31 December 2011 – TL 0), performance premium amounting to TL 28,000 (31 December 2011 – TL 28,357) and retirement bonuses on payment of TL 551 (31 December 2011 – TL 0).

Under the Turkish Labour Law, the Bank is required to pay termination benefits to each employee who has completed at least one year of service and whose employment is terminated without due cause, is called up for military service, dies or retires or earns the right to retire.

The amount payable consists of one month’s salary limited to a maximum of TL 3,129 (31 December 2011 – TL 2,732) for each year of service. The liability is not funded, as there is no funding requirement.

The reserve has been calculated by estimating the present value of the future probable obligation of the Bank arising from the retirement of its employees. TAS 19 requires actuarial valuation methods to be developed to estimate the enterprise’s obligation for such benefits. Accordingly, the following actuarial assumptions were used in the calculation of the total liability:

	Current period	Prior period
Discount rate (%)	2.38	4.66
Inflation rate (%)	5	5.2
Interest rate (%)	7.5	9.8

Movements in the reserve for employment termination benefits during period are as follows:
